Employ this ensemble of multi-digit place value worksheets to provide students of grade 4 and grade 5 to master place values for a range of large numbers in the millions and billions. Activities include inserting commas between numbers, MCQs, interesting word problems and much more! Some of worksheets are absolutely free of cost. Insert the commas - Activity Observe each number and insert commas based on the place value. The first-level pdf worksheets contain numbers up to hundred millions. Numbers in Level 2 comprise up to hundred billions. Two levels of difficulty with 5 worksheets each Download the set(10 Worksheets) Identify the place valueRead each number. Identify and write down the place values up to billions in the boxes provided. A number of intriguing word problems are included for variety. Download the set(5 Worksheets) Identify the place value of underlined digitsFind the value of the underlined digits in this series of printable multi-digit place value worksheets that features numbers in the millions and billions. Write your answers in either number form or word form. Solve the simple word problems provided. Download the set(5 Worksheets) Write the value of the specified digitChildren in 4th grade and 5th grade identify the place value of a specific digit in a series of numbers ranging from 7 to 12 digits. Use the 'Download the set' option to access all worksheets from this section. Download the set(5 Worksheets) Place value: MCQs On the basis of the numbers and place values given, select the correct answer from a series of large numbers. This forms a perfect evaluation tool to gauge a student's comprehension of place values in millions and billions. Download the set(5 Worksheets) What number am I?To find the mystery numbers, solve the clues provided in the form of place value of digits. Print and distribute these multi-digit place value worksheet pdfs for an engaging classroom or homework assignment. Download the set(5 Worksheets) You are here: Home → Worksheets → Grade 6 This is a comprehensive collection of free printable math worksheets for sixth grade, organized by topics such as multiplication, division, exponents, place value, algebraic thinking, decimals, measurement units, ratio, percent, prime factorization, GCF, LCM, fractions, integers, and geometry. They are randomly generated, printable from your browser, and include the answer key. The worksheets support any sixth grade math program, but go especially well with IXL's 6th grade math curriculum. The worksheets are randomly generated each time you click on the links below. You can also get a new, different one just by refreshing the page in your browser (press F5). You can print them directly from your browser window, but first check how it looks like in the "Print Preview". If the worksheet does not fit the page, adjust the margins, header, and footer in the Page Setup settings of your browser. Another option is to adjust the "scale" to 95% or 90% in the Print Preview. Some browsers and printers have "Print to fit" option, which will automatically scale the worksheet to fit the printable area. All worksheets come with an answer key placed on the 2nd page of the file. In sixth grade, students will start the study of beginning algebra (order of operations, expressions, and equations). They learn about ratios & percent and start using integers. Students also review long division, factoring, fraction arithmetic, and decimal arithmetic. In geometry, the focus is on the area of triangles and polygons and the volume of rectangular prisms. Other topics include rounding, exponents, GCF, LCM, and measuring units. Please note that these free worksheets do not cover all 6th grade topics; most notably, they do not include problem solving, Multiplication and Division and Some Review Long multiplication Long division 1-digit divisor, 5-digit dividend, no remainder 1-digit divisor, 5-digit dividend, with remainder 1-digit divisor, 6-digit dividend, no remainder 1-digit divisor, 6-digit dividend, with remainder 1-digit divisor, 7-digit dividend, no remainder 1-digit divisor, 7-digit dividend, with remainder 2-digit divisor, 5-digit dividend, no remainder 2-digit divisor, 5-digit dividend, with remainder 2-digit divisor, 6-digit dividend, no remainder 2-digit divisor, 6-digit dividend, with remainder 2-digit divisor, 7-digit dividend, no remainder 2-digit divisor, 7-digit dividend, with remainder 3-digit divisor, 6-digit dividend, no remainder 3-digit divisor, 6-digit dividend, with remainder 3-digit divisor, 7-digit dividend, no remainder 3-digit divisor, 7-digit dividend, with remainder Multiply decimals, writing the numbers under each other (0-2 decimal digits) Divide a whole number or a decimal by a whole number, need to add zeros to the dividend Convert a fraction to a decimal using long division, rounding the answers to three decimals Convert measuring units using long division & multiplication A good book on problem solving with very varied word problems and strategies on how to solve problems. Includes chapters on: Sequences, Problem-solving, Money, Percents, Algebraic Thinking, Negative Numbers, Logic, Ratios, Probability, Measurements, Fractions, Division. Each chapter's questions are broken down into four levels: easy, somewhat challenging, challenging, and very challenging. Exponents Easy exponents Challenge exponents Write using exponents Place value/Rounding Algebra Order of operations Three operations, uses + for division, no exponents Four operations, uses + for division, no exponents Two or three operations, uses the fraction line for division, no exponents Two or three operations, uses the fraction line for division, exponents included Two, three, or four operations, uses the fraction line, exponents included Expressions Equations Key to Algebra offers a unique, proven way to introduce algebra to your students. New concepts are explained in simple language, and examples are easy to follow. Word problems relate algebra to familiar situations, helping students to understand abstract concepts. Students develop understanding by solving equations and inequalities intuitively before formal solutions are introduced. Students begin their study of algebra in Books 1-4 using only integers. Books 5-7 introduce rational numbers and expressions. Books 8-10 extend coverage to the real number system. => Learn more Decimals to fractions or mixed numbers (tenths/hundredths/thousandths) Decimals to fractions or mixed numbers (up to millionths) Mixed numbers to decimals (denominators 10, 100, and 1000) Proper and improper fractions to decimals (denominators 10, 100, or 1000) Proper fractions to decimals (denominators powers of ten till 1,000,000) Mixed numbers to decimals (denominators powers of ten, till 1,000,000) Fractions or mixed numbers to decimals (easy, varied denominators) Fraction to decimals - need long division Fractions to decimals - mixed practice This is a workbook series by Key Curriculum Press that begins with basic concepts and operations on decimals. Then the books cover real-world uses of decimals in pricing, sports, metrics, calculators, and science. The set includes books 1-4. => Learn more Mental multiplication Multiply in columns Decimal Division Mental division Easy decimal division (dividend has 1-2 decimal digits, a whole number divisor) Like above, but missing dividend or divisor Divide decimals by decimals (Think of how many times the divisor fits into the quotient.) Mixed multiplication and division problems 1 (1 decimal digit) Divide whole numbers and decimals by 10, 100, or 1000 Same as above, missing dividend or divisor Multiply or divide decimals & whole numbers by 10, 100, and 1000 Divide whole numbers and decimals by 10, 100, 1000, or 10,000 Divide whole numbers and decimals by 10, 100, 1000, or 10,000 - missing dividend or divisor Long division Measuring units Customary system Convert measuring units using long division & multiplication (paper & pencil) or mental math Convert using a calculator, with decimals Metric system Convert between mm, cm and m - using decimals Convert between mm, cm, m, and km - using decimals Convert between ml & l and g & kg - using decimals All metric units mentioned above - mixed practice - using decimals Metric system: convert between the units of length (mm, cm, dm, m, dam, hm, km) Metric system: convert between the units of weight (mg, cg, dg, g, dag, hg, kg) Metric system: convert between the units of volume (ml, cl, dl, L, dal, hl, kl) Metric system: convert between the units of length, weight, and volume Ratio Write a ratio and simplify it Ratio word problems Percent Prime factorization, GCF, and LCM Fraction addition and subtraction Fraction multiplication In all fraction multiplication and division problems, it helps to simplify before you multiply. Fraction division Convert fractions to mixed numbers and vv Simplify or equivalent fractions Fractions vs. Decimals Integers Coordinate grid Addition & subtraction Addition and subtraction of integers are beyond the Common Core Standards for grade 6 but some curricula or standards may include them in 6th grade. Multiplication & Division Multiplication and division of integers are beyond the Common Core Standards for grade 6 but the worksheets links are included here for completeness sake, as some curricula or standards may include them in 6th grade. Geometry Area - these worksheets are done in the coordinate grid. Volume & surface area Since these worksheets below contain images of variable sizes, please first check how the worksheet looks like in print preview before printing. If it doesn't fit, you can either print it scaled (such as at 90%), or make another one by refreshing the worksheet page (F5) until you get one that fits. Optional topics Proportions Circle If you wish to have more control on the options such as number of problems or font size or spacing of problems, or range of numbers, just click on these links to use the worksheet generators yourself:
